

10 September 1951

Dear General Willoughby:

Many thanks for your good letter of the 29th of August. I believe it is my traveling brother who is likely to be on the broadcast with you since subsequent to my taking on this job here I have pretty well kept away from the airways.

I deeply appreciate your sending me the personal copy of the Japanese edition of the Sorge case and also your generosity in suggesting that you will make additional copies available to us. As the Director has advised you, I believe, we are taking steps to secure your papers from the Senate Committee.

I trust we can get together in the not too distant future to discuss further your plans which we had a brief chance to talk over when you were here.

Faithfully yours,

Allen W. Dulles

Major General Charles A. Willoughby

*My Dear Mr. Sullivan* Aug 29th

I see we are on an NBC broadcast together ? I consider that excellent and distinguished company. Were I superstitious ( which I am at times ), I would consider that an omen, a forecast of future association ? A very pleasant prospect, indeed ....

I enclose a personal copy of the Japanese edition of the " Sorge Case". I had planned to circulate this amongst Congress, for their education but changed my mind about it, or had it changed for me. However, since the edition is paid for, and being strictly limited, will become a collector's item, I have retained a few copies for friends and associates. The rest will go to G-2, for schools and CIA, for their schools. I will have available, in baggage now in transit, about 950 copies.

Eventually, I will build a book around this material, but use it differently. This edition is more of a " documentation" than a readable text.

I have other intelligence texts available; which I will send to you, from time to time, as possibly suitable for dissemination, within CIA. I have some estimates ( for the Sec of War ) of comparatively recent date, dealing with Japan and Korea. - Have I ever sent you my study on "Spain"? Kennan thought he could place it in " Foreign Affairs" but it was too hot then. (1947) It is still accurate as of 1951. - I am afraid that I shall be the proverbial voice in the wilderness ?
